

# Upswung HL410-220 Hydraulic Gate Opener

For a convenient and dependable operator, in a residential application, the HL410 will exceed your expectations. With its hydraulic design and fewer moving parts the HL 410 requires less maintenance & increases its reliability for long life.

- Full Systems Capability
- Master/Slave Operation
- Accessory Inputs
- Quick Disconnect
- Optional Radio Receiver (does not come with the package)
- Max. Cycles/Hour 7-10
- 1/4 Hp, 115 Volts @ 60Hz
- Weather-proof Control Box

The HL 410 is compact enough to fit on most gates and can be used on those gates that lack the space to place a traditional gate operator. Its small size and sleek design allow it to blend into any landscape environment. If a longer stroke is needed the HL 410L model offers an addition 10 3/4 " to the rod stroke, allowing it to support up to 2 feet more in gate length.

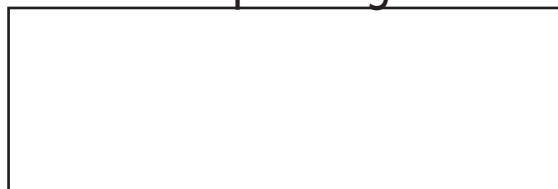

***The Upswung HL410-220 is an exact replacement for your Customer's Sentex HL 410-11***

Dimensions: HL 410 = 3 1/2 H x 3 1/2 D x 31 3/4" L      HL 410L = 3 1/2 H x 3 1/2 D x 48 3/4" L

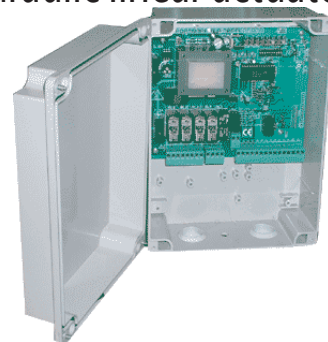

The HL 410 operators are typically used for the residential or small commercial buildings and the HL 410 is engineered with actuator technology. The HL410 hydraulic linear actuator supports gates up to 14 feet and 900 pounds.

One year Warrantee
