

Upswung HL410-440 Hydraulic Gate Opener

For a convenient and dependable operator, in a residential application, the HL410-440 will exceed your expectations. With its hydraulic design and fewer moving parts the HL 410 requires less maintenance & increases its reliability for long life.

- Full Systems Capability
- Master/Slave Operation
- Accessory Inputs
- Quick Disconnect
- Optional Radio Receiver (does not come with the package)
- Max. Cycles/Hour 35
- 230 Volts @ 60Hz
- Weather-proof Control Box

The HL 410 is compact enough to fit on most gates and can be used on those gates that lack the space to place a traditional gate operator. Its small size and sleek design allow it to blend into any landscape environment. If a longer stroke is needed the HL 410-390 & 440 offer an addition to the rod stroke, allowing it to support up to 4 feet more in gate length.

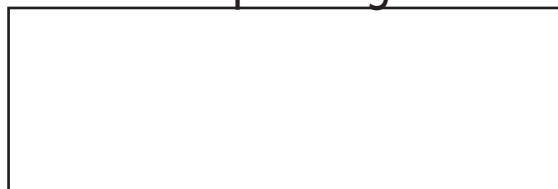

The Upswung HL410-440 is a powerful high cycle opener with a long stroke big gate Customer applications.

Dimensions: HL 410 = 3 1/2 H x 3 1/2 D x 49 1/4" L Stroke = 17 3/8"

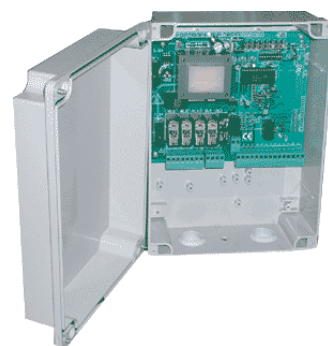

The HL 410 operators are typically used for the residential or small commercial buildings and the HL 410 is engineered with actuator technology.
